

Moulik Zinzala

India,Gujarat,Surat,395010| (+91) 6356531333 |  moulikzinzala912@gmail.com |  [LinkedIn](#) |  [GitHub](#) |

Profile

Aspiring Data Scientist with a solid foundation in Python, SQL, and data analysis. Skilled in using libraries and frameworks such as Pandas, NumPy, Scikit-learn, TensorFlow, LangChain, and LangGraph to extract insights, build predictive models, and develop intelligent agents. Passionate about applying data-driven solutions to real-world problems and committed to continuously learning and adopting emerging technologies and techniques.

PROJECTS

Here are some of my projects There are many of them Please give a visit to my [GitHub](#) for my Projects.

AI Career Guidance Platform | Prism.ai | [\[Project Link\]](#)

- Built a comprehensive AI-powered career guidance platform helping students discover personalized career paths through intelligent assessment and mentorship.
- Integrated FastAPI backend with Langchain orchestration, Google Gemini AI for personalized analysis, and MongoDB for robust data persistence.
- Ensured secure and scalable architecture with Firebase Authentication, Pydantic data validation, and modular API design for seamless user experiences.

MACHINE LEARNING | NETWORK SECURITY DETECTION | [GITHUB LINK](#)

- **Developed a Phishing Website Detection ML Project:** Built an end-to-end machine learning pipeline for detecting phishing websites, incorporating efficient data ingestion, transformation, validation, and modeling.
- **Pipeline Automation:** Automated artifact creation (e.g., preprocessor.pkl and model.pkl) for seamless predictions, leveraging YAML configuration for flexible and structured pipeline decoding.
- **Database Integration:** Utilized MongoDB for efficient storage, retrieval, and preprocessing of structured data, ensuring streamlined data handling.

COMPUTER VISION| VIRTUAL BOARDCASTER | [GITHUB LINK](#)

- DEVELOPED A PYTHON-BASED VIRTUAL WEBCAM TOOL USING OPENCV AND PYVIRTUALCAM TO BROADCAST VIDEOS OR IMAGES AS LIVE WEBCAM INPUT.
- ENABLED USERS TO SEAMLESSLY SWITCH BETWEEN PRERECORDED VIDEOS AND STATIC IMAGES WITH COMMAND-LINE CONTROL AND LOOPING SUPPORT.
- DESIGNED FOR VIRTUAL MEETINGS, CONTENT CREATION, AND ONLINE PRESENTATIONS ENHANCING USER INTERACTION AND CREATIVITY..

RESEARCH PAPER | BRAIN TUMOR DETECTION WITH EXPLAINABLE AI |

- DEVELOPED a CNN-based deep learning framework for automated brain tumor detection from MRI images, delivering high classification performance across multiple tumor types.
- INTEGRATED advanced Explainable AI (XAI) techniques including Grad-CAM, SHAP, and LIME to interpret model predictions, enhancing transparency, reliability, and clinical trust.
- PRESENTED & PUBLISHED the research paper with Springer, highlighting the real-world impact of combining deep learning with explainability in medical diagnostics.

Education

2023-2026

Bachelor Of Computer Science | UKA Tarsadia University | BV Patel Institute of Computer Science

Active Member of University’s Data Science Society

- Relevant coursework: Machine Learning, Data Analysis, and Statistical Modeling

SGPA : 8.65

Skills and Interests

• Python • Generative AI • Agentic AI • MySQL • Deep Learning • Predictive modeling • Excel	• Power BI • Machine Learning • Explanatory Data Analysis • Statistical Anlaysis • Communication • Critical thinking and problem-solving
---	--

Activities and Interests

Playing Chess, Football | Reading Books | Watching Documentary | Hiking
